### **AGOURON announces EXPANDED ACCESS Program 9/17/96**

Agouron announced an expanded access for their protease inhibitor nelfinavir.

If you are interested in participating, the expanded access telephone number is : **1-800-621-7111**.

In order to register your doctor must contact the program to officially register a patient. Initial registration includes requiring:

- documented CD4 count below 50 cells within last 90 days
- unable to use 3 approved protease inhibitors--saquinavir, zidovudine, didanosine--due to intolerance, contraindication, or prior failure.

Access to nelfinavir in this program is first-come-first served. You **MUST** call quickly and register. There is no lottery. If more applications come in than available spots, you will be put on a waiting list.

Agouron's web-site also has information on the expanded access program : <http://www.agouron.com>.
